

Senior AI Specialists (2 Opportunities) | Computer Vision / Agentic AI

An organisation making a serious investment in advanced AI capability and looking to hire two specialist AI professionals to help shape what comes next.

These are high-impact roles focused on building practical, real-world AI solutions — not experimentation for experimentation's sake. You'll join a business committed to using AI to solve meaningful operational challenges and create long-term internal capability.

Opportunities available

Senior AI Engineer – Computer Vision

Lead the design and deployment of AI solutions using image, video and sensor data. This may include automation, detection, monitoring, quality assurance, asset intelligence or optimisation use cases.

Senior AI Engineer – Agentic AI / Internal Models

Design and build intelligent internal AI systems including AI agents, workflow automation, private LLM solutions, internal copilots, and scalable model-driven tools that improve productivity and decision-making.

What you'll bring

- Strong software engineering background, ideally with Python
- Commercial experience delivering AI / machine learning solutions
- Experience taking ideas from prototype through to production
- Cloud platform exposure (Azure, AWS or GCP)
- Strong communication skills and ability to solve real business problems
- Practical mindset focused on outcomes and value

Ideal experience for Computer Vision

- OpenCV, PyTorch, TensorFlow
- Object detection, segmentation, image analytics
- Real-time inference or edge deployment exposure

Ideal experience for Agentic AI

- LLMs, RAG, LangGraph, LangChain or similar
- Multi-agent systems and orchestration
- Prompt systems, model evaluation, internal tooling
- Security and governance awareness in enterprise environments

Why this role

- Join a business genuinely investing in AI
- Greenfield opportunities with strong influence
- Solve meaningful, real-world problems
- Work with modern tools and emerging technologies
- Flexible working environment
- Competitive salary package
